

LinQ1Zero

Global eUICC SIM Connectivity Simplified

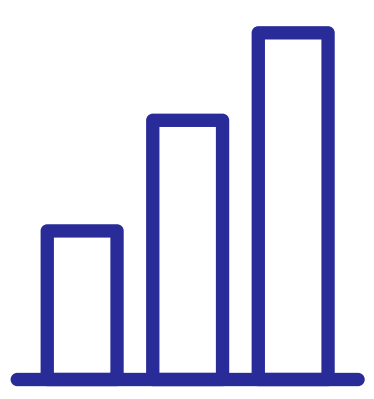

One SIM. Zero Touch. Infinite Scale.

NuvoLinQ's LinQ1Zero eliminates the complexity of IoT deployments with a single SKU, zero-touch provisioning, and **GSMA SGP.32-compliant** multi-carrier access. Stay secure, compliant, and connected—anywhere.

Why LinQ1Zero?

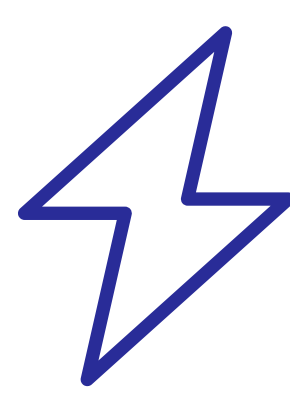

Optimized for IoT

Low-power, long-lifecycle devices with GSMA SGP.32 compliance.

Enterprise Security

Static IP, private APNs, SIM-level security with GSMA certification.

Always-On Uptime

Multi-carrier failover + bootstrap for mission-critical reliability. Always be connected.

Simplicity at Scale

One SKU. Zero-touch provisioning. Lifecycle control via LinQView.

Global Reach

Direct Tier 1 carrier access + localized profiles, no permanent roaming risks.

Key Features

- Single SKU with zero-touch provisioning
- Remote SIM provisioning & carrier transitions
- Direct Tier 1 carrier interconnects for low latency
- Flexible data pooling & "keep-alive" plans
- 24/7 enterprise-grade support with live technical assistance

Immediate Benefits

Faster onboarding & reduced deployment friction

Lower total cost of ownership with optimized billing

Future-proof connectivity for thousands of devices at scale

The NuvoLinQ Advantage

By combining Tier 1 global connectivity, Tier 1 carrier interconnects, and GSMA certified eIM security, LinQ1Zero delivers:

- Secure, compliant deployments
- Transparent billing—no overages, no surprises
- End-to-end lifecycle management with LinQView
